BACKGROUND OF THE INVENTION

The object of this invention is to provide added protein to breads, cereals, rice, and pastas.

BRIEF SUMMARY OF THE INVENTTION

A protein additive made from powdered collagen is mixed with any grain, rice, or pasta flour to make a bread, cereal, pasta, or rice product to provide protein that is otherwise absent from these products.

DETAILED DESCRIPTION OF THE INVENTION

Collagen, a beef by-product, is ground into a powder. This powder is then combined with any grain or rice flour and made into breads, rolls, buns, flat breads, cereals, pastas. Instead of getting nourishment solely from the bread there is additional protein added from the collagen.
